10" Android Room Booking Device

Use the RFID and NFC capabilities to scan corporate badges to book a room.

The Android OS makes for wide possibilities in applications on this Quad-Core device.

It also enables you to manage and monitor all room-booking procedures in the cloud.

The chassis is slim and comes with a metal bracket, which ensures quality and the device being tamperproof.

The eTILE-X1032TB works via PoE and therefore, updates and powered via one cable at the same time!
